

Mahmoud Hisham Almodalal

Backend & AI Engineer | Python, Django, LLM Applications

ghg17273@gmail.com | [+972 597 747 084](tel:+972597747084) | [GitHub](#)

PROFILE

Computer Engineer and backend developer specializing in Python, Django, scalable SaaS applications, and AI-powered systems. Experienced in multi-tenant architecture, REST APIs, PostgreSQL, RAG/LLM integrations, and production deployment with Docker, CI/CD, and Nginx.

TECHNICAL SKILLS

Backend: Python, Django, DRF, FastAPI, PHP, Laravel, REST APIs, WebSockets

Databases: PostgreSQL, MySQL, SQLite, Oracle DB, Redis

AI: LLMs, RAG, OpenAI, Gemini, DeepSeek, YOLOv8, DeepSort, InsightFace

DevOps: Docker, GitHub Actions CI/CD, Nginx, Linux, Cloudflare, Git/GitHub

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Bootstrap

EXPERIENCE

Computer Engineering Instructor - MET Academy

May 2025 - Present | Part-time, Remote | Saudi Arabia

- Teach Calculus, Logic Design, and Computer Architecture to computer science students.

Co-Founder & Backend Developer - EduTracker

Self-employed | Remote, Gaza, Palestine | Graduation Project

- Built a multi-tenant school-management SaaS backend using Clean Architecture and Service / Selector / Policy layers.
- Designed a 32-entity PostgreSQL schema with Arabic full-text search and multi-role RBAC for managers, teachers, secretaries, and guardians.
- Implemented CI/CD with GitHub Actions, Docker Compose, Nginx, SSL, Cloudflare, Celery, and Redis.

Web Development Intern - Ministry of Health, IT Department

Aug 2025 - Mar 2026

- Built responsive interfaces and server-side functionality using HTML/CSS/JavaScript/Bootstrap, PHP, and Laravel.
- Worked with MySQL and Oracle DB for database management and optimization.

AI Scripting Specialist - PDX Ai Scripting

Aug 2023 - Oct 2023

- Developed face-detection and face-recognition solutions for video footage and optimized AI processing performance.

Python Intern (Machine Learning & AI) - Al-Raja International Training Company

Jul 2022 - Oct 2022 | Reference: R/J2022/6789

- Completed an intensive Python internship focused on Machine Learning and Artificial Intelligence; contributed to software projects and algorithm development.

SELECTED PROJECTS

EduTracker - Multi-tenant School Management SaaS

Bilingual platform centralizing school administration, tuition tracking, communication, role-specific dashboards, offline support, and automatic sync.

Stack: React 19, Vite, Tailwind CSS, Django, PostgreSQL, Celery, Redis, Docker, Nginx, GitHub Actions

[Live](#) | [EduTracker LinkedIn](#) | Repo: Private

Noor Al-Huda - Quran Center Management Platform

Management platform serving 300+ students and replacing paper logs with an offline-capable workflow for memorization progress, automated PDF report cards, and targeted announcements.

Stack: Next.js, TypeScript, Tailwind CSS, Dexie.js, Django REST Framework, PostgreSQL, Docker, Render, Vercel

[Live](#) | [GitHub Repository](#)

clientMORE - AI Customer Support SaaS

Omnichannel Arabic/English AI support platform with document-driven assistance, smart escalation, WebSockets, Telegram/WhatsApp routing, Hybrid RAG, and a multi-provider LLM chain.

Stack: Next.js, TypeScript, Tailwind CSS, FastAPI, SQLite, ChromaDB, WebSockets, Telegram API, Twilio, Docker

[Live](#) | [GitHub Repository](#)

EDUCATION

B.Sc. in Computer Engineering - Islamic University of Gaza

Graduated: March 2026 | GPA: 91%

SELECTED CERTIFICATIONS

- Neural Networks and Deep Learning - DeepLearning.AI / Coursera - [Verify](#)
- Django Application Development with SQL - IBM / Coursera - [Verify](#)
- Machine Learning - HOP International Center, Jordan - [View Certificate](#)

LEADERSHIP & ACADEMIC CONTRIBUTION

Led peer study sessions in Computer Engineering and provided technical tutoring in Data Structures, Algorithms, and Networking. Reach Education Fund Scholar.
